

PARTICIPANT INFORMATION SHEET

You have been directly or indirectly invited to take part in this survey. Before you decide, it is important for you to understand why the survey is being done and what it would involve. Please take time to read the following information carefully and discuss it with others if you wish. Ask us if there is anything that is not clear or if you would like more information. Take time to decide whether or not you wish to take part and remember that your participation is voluntary.

What is the purpose of the survey?

The purpose of this survey is to gather information on the drivers and barriers of research, in particular to understand researchers' reasons for the choice, use and spread of experimental models or educational resources. The data collected will be anonymised and released publicly and also internally analyzed for future project planning and published as a report on the [FRESCI website](#) or in an appropriate scientific peer reviewed journal, and/or presented at scientific meetings.

Why have I been invited?

You have been invited because you have been identified as a researcher in life science and/or human and animal health, therefore qualified to provide information on your professional research experience.

Do I have to take part?

It is up to you to decide whether to take part. If you do decide to take part you will be asked to confirm your consent prior to beginning the survey. If you decide to take part you are still free to withdraw at any time and without giving a reason by sending an e-mail to team@fre-sci.com.

Am I eligible to take part?

You are eligible to take part in this survey if you are or were a researcher in life science, human and animal health. We welcome responses from those working in industry (pharmaceutical, cosmetics, chemical, consumer goods sectors etc), for contract research organisations (CROs), in academia and those working in other roles, such as regulators.

Confidentiality/intellectual property

Participants should not compromise themselves by breaching any non-disclosure agreements (NDAs), company policy, confidentiality requirements, in completing the survey.

Expenses and reimbursement

There is no financial incentive to take part in this survey.

How much time will the survey take?

The survey asks you to provide information on your research experience. The survey is split into different sections depending on the topic and will take about 15 minutes to complete.

What will I have to do?

You will answer a series of questions asking about your current state of your research and the research environment in general.

What are the possible disadvantages and risks of taking part?

There are no anticipated risks to you if you take part in the survey, nor are there likely to be any adverse effects.

What are the possible benefits of taking part?

There are no direct benefits to you taking part; however, your involvement will help us reconstruct and disseminate a truer picture of European research on a sensitive topic.

What if there is a problem?

If you have any problems during the survey, please contact the primary researcher (see *below*).

Will my taking part in this survey be kept confidential?

Yes, this survey can be completed anonymously, and it will not be possible for us to link your answers back to you, unless you provide us with your contact details (optional). If you choose to provide your contact details (name and email address) these will be kept confidential and will not be used for any purpose except in the context of the survey.

research - EU trends 2020

FRESCI
We help your science

What would happen to the results of the survey?

When the survey has been completed, we will analyse the data collected, and the data will be used to draft a public report on the [FRESCI website](#) or in an appropriate scientific peer reviewed journal, and/or presented at scientific meetings

Can I withdraw my data after I have participated in the survey?

This will only be possible if you provide us with your contact details. If you choose not to provide your contact details there will be no links between your identity and your anonymous data, so we will be unable to withdraw your data.

Who is organising and funding the research?

This study is planned, organised by and property of [FRESCI](#) by [SCIENCE&STRATEGY SL](#) through the financial aid provided by the Eurogroup for Animals.

Who can I contact for further information?

If you have any questions, then please contact the primary researcher: Dr. Marco Straccia

E-mail: marco.straccia@fre-sci.info
